**WE SPECIALIZE IN ELECTRICAL
& MECHANICAL SOLUTIONS
WHICH OFFER UNRIVALED
COMFORT, SAFETY, AND
EFFICIENCY TO THE PLACES
WHERE PEOPLE WORK AND LIVE**

JMG Limited excels in delivering Electro-Mechanical solutions tailored for residential, commercial, and industrial sectors. Our portfolio spans from backup power generation and electrical offerings to elevators & escalators, cooling technologies, and air compressors.

With a commitment to efficiency, we prioritize cost-effective solutions and ensure meticulous maintenance across our equipment line.

We provide a comprehensive suite of solutions to energize and modernize any infrastructure, while facilitating seamless mobility and optimal temperature control.

ISO CERTIFICATES

JMG has achieved significant milestones in its commitment to excellence, environmental responsibility, and occupational health and safety by acquiring three key ISO certifications. These certifications are a testament to JMG's dedication to maintaining high standards in various aspects of its operations.

POWER GENERATION

DIESEL GENERATORS

Diesel Generators

JMG delivers unmatched power reliability with FG Wilson diesel generators powered by world-renowned Perkins engines, built for superior durability, efficiency, and performance in even the most demanding environments. From large-scale industrial operations to tailored commercial solutions, FG Wilson sets the global benchmark for excellence. Complementing this, our Eletromak range offers robust, dependable diesel generators designed for everyday use, combining rugged engineering with exceptional value — ensuring you stay powered, no matter the challenge.

POWER GENERATION

GAS GENERATORS

Gas Generators

Experience the future of clean, high-performance energy with JMG's gas generator solutions from Guascor Energy and Mitsubishi. Engineered for efficiency and reduced emissions, Guascor Energy generators deliver reliable, sustainable power for industries seeking a greener edge. Paired with Mitsubishi's cutting-edge technology and legendary Japanese precision, our gas-powered systems provide long-lasting performance, fuel flexibility, and exceptional operational savings — redefining what it means to power your world responsibly.

SOLAR POWER SYSTEMS

Solar Panels, Lithium Batteries, Hybrid Solar Inverters, High Frequency Solar Inverters
Featuring products from Longi, the world's leading PV provider, MUST's high-performance High Frequency Solar Inverters, and Deye's A-class lithium batteries, we offer reliable and efficient solar solutions. Whether for homes or large enterprises, we are ready to meet any energy requirement with the best in solar technology to power sustainability in any project.

ALTERNATIVE POWER

Inverters & Batteries

We've enhanced our range to include alternative power choices, like batteries and inverters, giving you more ways to meet your energy needs. This allows for eco-friendlier options and potential savings. Whether powering a home or a business, trust in JMG's dependable energy solutions. And for those wanting a mix, we provide hybrid options that blend diesel with modern energy sources.

ELEVATORS & ESCALATORS

Elevators & Escalators

At JMG, we've joined forces with TK Elevator, a global leader, to provide premier elevators and escalators. These products move people and are an essential part of every modern building and the urban landscape. TKE's cutting-edge technology offers safety, efficiency, and elegant design. JMG is committed to helping our customers find the ideal solution that fits their unique needs and budget. Our success is marked by notable installations across Nigeria, including prominent landmarks like the largest church in the country and international airports.

American brand 

COOLING SOLUTIONS

Air Conditioning

Within our cooling solutions division, we provide air conditioning systems through our partnership with Trane, the most trusted and premier American brand renowned for its exceptional technology. Whether your requirements involve rooftop units, TVR systems, split & standing AC, or cassette units, Trane offers a versatile selection of cooling solutions meticulously crafted to provide tailored comfort and peak efficiency. Our proficiency extends to excelling in any infrastructure scenario.

AIR COMPRESSORS

KAESER
COMPRESSORS

When our customers need compressed air for industries, construction, or other tasks powered by air, our air compressor division offers exceptional German technology with Kaeser Air Compressors. These compressors are renowned for their top-notch quality and lasting performance. With our dedicated expertise and customer-focused approach, the JMG Air Compressor experts are here to guide customers in choosing the right air compressor for their needs. Moreover, we provide maintenance and spare parts support to ensure their investment remains functional and efficient.
